BUDOWSKI, P., I. ISHAAYA AND M. KATZ. Growth inhibition of *Dermestes maculatus* by phytosterols, 201.
BULL, E. C. See Hurwitz, S., 208.
BULL, R. C., AND J. E. OLDFIELD. Selenium involvement in the oxidation by rat liver tissue of certain tricarboxylic acid cycle intermediates, 237.
1,3-Butanediol, utilization by rat as synthetic source of dietary energy, 79.
BUTDORF, JANET. See Conrad, H. R., 337.
BUTTON, GRACE M. See Brown, R. Glenn, 99.

C

Calcium and gossypol, effect on performance of swine and certain enzymes and other blood constituents, 47.
— content, skeletal, and bone fragility in rats, effect of water fluoridation, 353.
—, dietary, long-term studies of hypolipemic effect in mature male rats fed cocoa butter, 213.

—, in vitro transport by chick intestine, effect of vitamin D_3, 319.
— oxalate metabolism in the pack rat, sand rat, hamster, and white rat, 496.
— -to-^{90}Sr intake, reduction through food substitutions in fruit and vegetable category, 375.
California, University of, and Agnes Fay Morgan's career at, (Sup. 1), 1.
Calorie(s) efficiency ratio and protein quality of soybean infant formulas, method of comparing in rats, 213.
— restriction and deprivation, effects on obese hyperlipemic rat, 247.
Calves, thiamine-deficient, and pyruvate metabolism, 63.
Carbohydrate(s), available, determination in plant and animal foods, (Sup. 2), 1.
—, different, with balanced and imbalanced protein, in fat diets, metabolic responses of rats, 69.
—, dietary, effect on liver content and on serum lipids in relation to age and strain of rat, 275.
—, dietary, effect on magnesium utilization in chicks, 223.
CARROLL, CATHERINE. See Gaertner, Elizabeth Bright, 69.
Cartilage of guinea pigs, effect of manganese deficiency on acid mucopolysaccharides, 447.
Cell(s) number, size and division in organs of neonatal rats given increased feeding, 179.
Cellular biochemistry, relation of nutrition, (Sup. 1), 45.
CHANG, S. I. See Fuller, H. L., 477.
Chicken(s), comparative study of nutrition and physiological significance of pure soybean trypsin inhibitors and of ethanol-extracted soybean meals in chicks and rats, 358.
—, comparison of actions of vitamins D_2 and D_3 in chicks, retention in serum, liver and intestinal mucosa, 208.
—, detoxication of dietary tannic acid by chicks, 477.
—, effect of cyclopropenoid fatty acids on cholesterol metabolism of cockerels, 174.
—, effect of retinyl acetate and retinoic acid on vitamin K deficiency in chicks, 299.
—, effect of some dietary factors and drugs on cholesterol concentration in egg and plasma of hens, 119.
—, effect of vitamin D_3 on in vitro transport of calcium by chick intestine, 319.
—, effects of dietary protein level on growth and proteolytic activity of avian pancreas, 421.
—, influence of dietary carbohydrates on magnesium utilization, 223.
—, influence of lactose and glucose on ^{28}Mg in chicks, 231.
—, growing, effects of glucose supplementation of high lipid diets based on free fatty acids, 261.
—, male, fed high linoleic acid diet, effect of vitamin E in reversing sterility, 219.
—, plasma amino acid pattern of chicks and length of feeding period, 503.
—, "selenium-responsive" myopathies of myocardium and of smooth muscle in young poults, 573.
—, serum protein level and body composition in chicks, 468.
—, ultrastructure of aortic tissue in copper-deficient chick embryos, 283.
Children, preadolescent, prediction of metabolizable energy, 348.
Cholesterol concentration in egg and plasma of hen, effect of some dietary factors and drugs, 119.
—, effect of ascorbic acid in animals and man, 107.
— esters, prolonged intake of ethanol with nutritionally adequate liquid diet by rats, 331.
— in experimental atherosclerosis in rabbits, effect of methionine supplementation, 441.
— in livers of rats fed various carbohydrates, relation to age and strain of rat, 275.
—, inhibitory action of physterols in development of *Dermestes maculatus*, 201.
— metabolism of cockerels, effect of cyclopropenoid fatty acids, 174.
Choline-deficient rats, factors affecting survival, with emphasis on dietary sodium, 307.
CHOW, BACON F. See Hsueh, Andie M., 195.
CHRISTENSEN, D. A., L. E. LLOYD AND E. W. CRAMPTON. Nutritive value for rats of certain by-products of the corn refining industry, 137.
Cinnamon, free choice consumption of spiced diets by rats, 129.
Cloves, free choice consumption of spiced diets by rats, 129.
Cocoa butter, hypolipemic long-term effect of dietary calcium in mature male rats fed, 213.
COHEN, NINA L., PILAR REYES, JOHN T. TYPPO AND GEORGE M. BRIGGS. Vitamin B_{12} deficiency in the golden hamster, 482.
Collagen metabolism in rat skin, effect of vitamin E deficiency, 99.
COMAR, C. L. See Thompson, J. C., Jr., 375.
COMBS, G. F. See Thomas, O. P., 468.
CONRAD, H. R., J. W. HIBBS AND A. D. PRATT. Effect of plane of nutrition and source of nitrogen on methionine synthesis in cows, 343.
CONRAD, H. R., R. C. MILES AND JANET BUTDORF. Estimation of methionine synthesis in intact cows after administering sulfide-^{35}S, 337.
CONWAY, EMILY S. See Taylor, Doris D., 275.
Copper absorption in rats, zinc interference, 473.
— -deficient chick embryos, ultrastructure of aortic tissue, 283.
Coprophagy, effect on steatorrhea in rats with intestinal diverticula, 461.
Corn, by-products from wet-milling, protein quality measured by egg replacement values, rats, 137.
— protein, starch-free nutritional value for rats, 137.
Cottonseed oil, effect on cholesterol metabolism of cockerels, 174.
Cow(s), effect of plane of nutrition and nitrogen source on methionine synthesis, 343.
—, intact, estimation of methionine synthesis after sulfide-^{35}S synthesis, 337.
^{14}C-Pyrimidine-labeled thiamine, ^{41}C-thiazole-labeled thiamine and ^{35}S-labeled thiamine in the rat, 9.
CRAMPTON, E. W. See Christensen, D. A., 137.
Creatine, possible factor in low transamidinase activities of kidneys of protein-depleted rats, 383.
— synthesis rates and carcass transamidinase activities in protein-depleted rats, 391.

Crotonate, metabolism of hydroxylysine by rats, 143.
^{14}C-Thiazole-, ^{14}C-pyrimidine-, and ^{35}S-labeled thiamine, comparative studies in the rat, 9.
